

Changing Proxy Server Setting Prior to Using Polaris Transfer Program

1. Open Internet Explorer
2. View Internet Explorer Menu Bar. If Menu Bar is not displayed press the ALT key.
3. Select **Tools** on Menu Bar
4. Select **Internet Options** on drop down menu
5. Select the **Connections** tab in the Internet Options window.
6. Select **LAN settings** Button in the Internet Options window..
7. Uncheck **Use automatic configuration script** in the Local Area Network (LAN) Settings window.
8. Uncheck **Use a proxy server for your LAN (These setting will not apply to dial up or VPN connections)** in the Local Area Network (LAN) Settings window.
9. Click **OK** in the Local Area Network (LAN) Settings window.
10. Click **OK** in the Internet Options window.
11. Open the Polaris Transfer Program and transfer recorded flight data.
12. Logoff computer when finished. Logging off the computer will reset the Proxy Server settings to the default settings.
